

Lisp Style & Design

Molly M. Miller and Eric Benson

Preface

Chapter 1 Introduction

- 1.1 Style and Communication
- 1.2 Style and LISP
- 1.3 Our Approach to Style
- 1.4 Typographical Conventions

Chapter 2 Getting Started

- 2.1 Understanding a Programming Problem
- 2.2 Subdividing the Programming Problem
- 2.3 Writing Experimental Code

Chapter 3 Choosing the Best Constructs

- 3.1 Steps Toward Good Code
- 3.2 LISP Data Structures
- 3.3 Appropriateness of LISP Constructs
- 3.4 Programming Idioms

Chapter 4 Putting the Pieces Together

- 4.1 Using Program Tools Well
- 4.2 Abstraction
- 4.3 Intermodule Interfaces
- 4.4 Fine-Tuning a Program

Chapter 5 Commenting and Organizing the Files

- 5.1 Introduction
- 5.2 Self-Commenting Code
- 5.3 Useful Commentary
- 5.4 Code File Organization

Chapter 6 Debugging

- 6.1 The Style of Debugging
- 6.2 LISP Debugging Tools
- 6.3 Debugging Methodology
- 6.4 Program Maintenance

Chapter 7 Efficiency

- 7.1 Introduction
- 7.2 Programming Efficiently
- 7.3 Declarations and Compilation
- 7.4 Generalizing Program Code

Appendix A The Personal Planner

Appendix B A Sample Session

Appendix C Suggested Exercises
