

Common LISPcraft

Robert Wilensky

Chapter 1 Getting Started

- 1.1 Introduction
- 1.2 The LISP Interpreter
- 1.3 Evaluation
 - 1.3.1 Evaluating More Complicated S-expressions
- 1.4 Arguments to Functions
- 1.5 Symbols
- 1.6 Leaving LISP
- 1.7 Summary
- Exercises

Chapter 2 Symbolic Computation

- 2.1 Introduction
- 2.2 More on Lists
- 2.3 Taking Things Literally
- 2.4 `car` and `cdr`
- 2.5 `cadr`, etc.
- 2.6 The Empty List
- 2.7 `cons`
- 2.8 List Construction Example
- 2.9 Summary
- Exercises

Chapter 3 Defining Our Own Functions

- 3.1 Introduction
- 3.2 User-Defined Functions
- 3.3 The Treatment of Formal Parameters
- 3.4 Free Occurrences, Special Variables and Global Variables
 - 3.4.1 Free and Bound Symbols

- 3.4.2 Global Variables
- 3.4.3 Scope
- 3.4.4 Special Variables
- 3.5 Saving Functions in Files
- 3.6 Summary
 - Excercises
 - Addendum – A Note on Terminology

Chapter 4 Predicates, Conditionals, and Logical Operators

- 4.1 Introduction
- 4.2 LISP Predicates
- 4.3 Conditionals
 - 4.3.1 More Complex `conds`
 - 4.3.2 The General Form of `cond`
 - 4.3.3 Other Conditionals
- 4.4 Logical Operators
 - 4.4.1 Using `and` and `or` for Flow of Control
- 4.5 Summary
 - Exercises

Chapter 5 Iteration in LISP

- 5.1 Introduction — Recursion versus Iteration
- 5.2 Structured Iteration
 - 5.2.1 Other Structured Iteration Functions
- 5.3 `prog`
 - 5.3.1 The General `prog`
- 5.4 Other Iterative Forms
- 5.5 Summary
 - Exercises

Chapter 6 Recursion

- 6.1 Introduction
- 6.2 The Fundamentals of Recursion
- 6.3 Some Examples of Recursive Thinking

- 6.4 Recursion and Parameters
- 6.5 A Common Recursive Bug
- 6.6 More Complex Recursion
- 6.7 Programming Notes
- 6.8 A Recursive Trace
- 6.9 Iteration versus Recursion
- 6.10 Summary
- Exercises

Chapter 7 Property Lists

- 7.1 Introduction
- 7.2 The Basics
- 7.3 An Example
- 7.4 The Significance of Property Lists
- 7.5 Property Lists and the Uniqueness of Symbols
- 7.6 Property Lists without Symbols
- 7.7 Summary
- Exercises

Chapter 8 Control Over Evaluation and Function Application

- 8.1 Introduction
- 8.2 Functions as Arguments
- 8.3 `apply` and `funcall`
 - 8.3.1 The FUNARG Problem
- 8.4 `eval`
 - 8.4.1 Context Problems with `eval`
- 8.5 Mapping Functions
 - 8.5.1 The Various Mapping Functions
 - 8.5.2 The `apply-append` Trick
- 8.6 Summary
- Exercises

Chapter 9 Lambda

- 9.1 Introduction

- 9.2 Functions without Names
- 9.3 `symbol-function` and LISP Internals
- 9.4 Some More Examples
- 9.5 The Function `function`
- 9.6 Using Lambda for Creating New Variables
- 9.7 The Significance of Lambda
- 9.8 Summary
- Exercises

Chapter 10 Reading and Writing

- 10.1 Introduction
- 10.2 `read` and `print`
- 10.3 Reading and Printing Symbols with Unusual Names
- 10.4 Strings
- 10.5 Redirecting
 - 10.5.1 Handling End-of-File Conditions
 - 10.5.2 Pathnames
- 10.6 Pretty-printing
- 10.7 `format`
- 10.8 Miscellaneous
- 10.9 LISP in LISP
 - 10.9.1 Evalquote Top Level
 - 10.9.2 `read-eval-print` Loops
- 10.10 Summary
- Exercises

Chapter 11 Debugging

- 11.1 Debugging in LISP
- 11.2 The Common LISP Debugger
 - 11.2.1 Examining the Stack
 - 11.2.2 Other Debugger Commands
 - 11.2.3 Recursively Entering the Debugger
- 11.3 The Common LISP Trace Package

11.4 The Common LISP Stepper

11.5 Summary

Exercises

Chapter 12 Writing More Flexible Functions

12.1 Introduction

12.2 Optional Arguments

12.3 The Rest Parameter

12.4 Keyword Parameters

12.4.1 More On Keywords

12.4.2 Interaction Between Keyword and Rest Parameters

12.4.3 Terminology

12.5 Auxiliary Variables

12.6 Closures

12.6.1 Closing a Set of Functions

12.7 Compiled and Foreign Functions

12.8 Summary

Exercises

Chapter 13 Macros

13.1 Introduction

13.2 Using Macros to Write More Readable Code

13.3 Defining Macros

13.4 Macro Expansion

13.5 Some Sample Macros

13.6 Macro Writing Techniques

13.7 Advanced `defmacro` Features

13.7.1 Destructuring

13.8 Special Functions and Macros

13.9 Modes of Macro Usage

13.10 Macro and Programming Style

13.11 Macro Implementation

13.12 Summary

Exercises

Chapter 14 Macro Characters

- 14.1 Introduction
 - 14.2 Executing Functions during **read**
 - 14.3 Defining Macro Characters
 - 14.4 Macro Characters that Return No Value
 - 14.5 The Backquote Macro Character
 - 14.5.1 Using Backquote in Macro Definitions
 - 14.6 The Dispatching Macro Character
 - 14.7 Some Additional Facts about Characters
 - 14.8 Summary
- Exercises

Chapter 15 List Representation

- 15.1 Introduction
 - 15.2 Internal Representation of Lists
 - 15.3 Dotted Pair Notation
 - 15.4 Multiple Pointers to the Same Object
 - 15.4.1 **eq** and **eq1**
 - 15.5 The Evil of **rplaca** and **rplacd**
 - 15.6 Summary
- Exercises

Chapter 16 Non-standard Flow of Control

- 16.1 Introduction
 - 16.2 Blocks
 - 16.3 **catch** and **throw**
 - 16.4 Multiple Values
 - 16.4.1 Functions for Receiving Multiple Values
 - 16.4.2 Functions for Generating Multiple Values
 - 16.4.3 Passing Around Multiple Values
 - 16.5 Summary
- Exercises

Chapter 17 Packages

- 17.1 `read` Reconsidered
- 17.2 Tracking Symbol Names
- 17.3 The Representation of Symbols
- 17.4 Packages
- 17.5 Symbol Creation and Package Updating Functions
 - 17.5.1 Making New Symbols
 - 17.5.2 Automatic Name Generation
 - 17.5.3 Removing Symbols from a Package
- 17.6 Package Manipulation
 - 17.6.1 Package Structure
 - 17.6.2 Standard Common LISP Packages
 - 17.6.3 Modules
- 17.7 Summary
 - Exercises

Chapter 18 Other Data Types

- 18.1 Introduction
- 18.2 Data Types in Common LISP
- 18.3 The Standard Common LISP Data Types
 - 18.3.1 Combining and Specializing Data Types
- 18.4 Arrays
- 18.5 Vectors
- 18.6 Strings
- 18.7 Sequences
- 18.8 Hash Tables
- 18.9 Structures
- 18.10 Summary
 - Exercises

Chapter 19 Systems Functions

- 19.1 Introduction
- 19.2 Internal LISP Systems Functions

- 19.2.1 Time and Space Functions
- 19.2.2 Object Description Functions
- 19.3 External LISP Systems Functions
 - 19.3.1 File System Functions
 - 19.3.2 Static Environment Functions
 - 19.3.3 Other System Functions
- 19.4 Summary

Chapter 20 Compilation

- 20.1 Introduction to LISP Compilation
- 20.2 Using the LISP Compiler
- 20.3 `eval-when`
 - 20.3.1 `#`, and `#.`
- 20.4 Declarations
 - 20.4.1 `declare`
 - 20.4.2 Local Declarations
 - 20.4.3 Global Declarations
 - 20.4.4 Types of Declarations
 - 20.4.5 Type Declarations
 - 20.4.5.1 More Elaborate Type Specifiers
 - 20.4.5.2 Defining New Type Specifier Symbols
 - 20.4.5.3 Declaring Function Types
 - 20.4.5.4 Declaring the Type of the Value of a Form
 - 20.4.6 Other Declaration Specifiers
 - 20.4.6.1 Open-coding
 - 20.4.6.2 Ignoring Variables
 - 20.4.6.3 Tailoring Optimization
 - 20.4.6.4 Special Variables
- 20.5 Summary
 - Exercise

Chapter 21 LISP Applications: Pattern Matching

- 21.1 Introduction
- 21.2 Pattern Matching
- 21.3 A Notion of Similarity

- 21.4 Pattern Matching Variable Bindings
- 21.5 Unification
- 21.6 The Matcher
- 21.7 Summary
- Exercises

Chapter 22 LISP Applications: Associative Data Base Management

- 22.1 Introduction
- 22.2 An Associative Data Base Implementation
 - 22.2.1 Some Implementation Considerations
 - 22.2.2 The Manager
- 22.3 Indexing
- 22.4 A Deductive Retriever
 - 22.4.1 Backward Chaining
 - 22.4.2 A Deductive Retriever Implementation
- 22.5 Summary
- Exercises

Appendix A Summary of Common LISP Functions

- 1 Data Structure Access and Manipulation Functions
 - 1.1 General Data Structure Predicates
 - 1.1.1 Data Type Determination Functions
 - 1.1.2 Data Structure Comparison Functions
 - 1.2 Sequences
 - 1.2.1 Sequence Creation Functions
 - 1.2.2 Sequence Predicates
 - 1.2.3 Sequence Accessing Functions
 - 1.2.4 Sequence Manipulation Functions
 - 1.3 Lists
 - 1.3.1 List Creation Functions
 - 1.3.2 List Predicates
 - 1.3.3 List Accessing Functions
 - 1.3.4 List Manipulation Functions
 - 1.3.5 Association List Functions
 - 1.3.6 Set Functions

- 1.4 Symbols and Packages
 - 1.4.1 Symbol and Package Creation Functions
 - 1.4.2 Symbol and Package Predicates
 - 1.4.3 Symbol and Package Accessing Functions
 - 1.4.4 Symbol and Package Manipulation Functions
- 1.5 Arrays
 - 1.5.1 Array Creation Functions
 - 1.5.2 Array Predicates
 - 1.5.3 Array Accessing Functions
 - 1.5.4 Array Manipulation Functions
- 1.6 Strings and Characters
 - 1.6.1 String and Character Creation Functions
 - 1.6.2 String and Character Predicates
 - 1.6.3 String and Character Accessing Functions
 - 1.6.4 String and Character Manipulation Functions
- 1.7 Other Data Structure Functions
 - 1.7.1 Hash Table Functions
 - 1.7.2 Miscellaneous Data Structure Functions
- 2 Arithmetic Functions
 - 2.1 Arithmetic Predicates
 - 2.2 Simple Arithmetic Functions
 - 2.3 Trigonometric Functions
 - 2.4 Logical Operations on Numbers
 - 2.5 Byte Manipulation Functions
 - 2.6 Other Arithmetic Functions
- 3 Stream, File and Input/Output Functions
- 4 Flow of Control Functions
- 5 Evaluation Control Functions
- 6 Debugging Functions
- 7 Function Definition Functions
- 8 Miscellaneous Functions
 - 8.1 Declaration Functions
 - 8.2 Systems Functions
 - 8.3 Other Functions

Appendix B Special Common LISP Symbols and Characters
