

The T Programming Language: A Dialect of Lisp

Stephen Slade

Preface

Acknowledgements

Chapter 1 LISP and T

1.1 Chapter Summary

Chapter 2 A Tutorial Reference

2.1 The LISP Interpreter

2.2 Running T

2.3 Simple Arithmetic

2.4 Objects

2.5 Symbols and Variables

2.6 Defining Variables and Procedures

2.7 File Input

2.8 Predicates

2.9 Conditionals

2.10 Dot Notation

2.11 Exercises

2.11.1 Expression Drill

2.11.2 Defining New Procedures

2.11.3 Foreign Procedure Names

2.11.4 Zeller's Congruence

2.11.5 `signum` and `interest-rate` Redefined

2.11.6 `go-to-movie?` Redefined

2.11.7 `cond` vs. `and/or`

2.11.8 `and/or` Redefined

2.11.9 `floor` and `ceiling`

2.11.10 Leap Year

2.11.11 Zeller Revisited

2.12 Chapter Summary

Chapter 3 Lists

- 3.1 List Operations: `car`, `cdr`, and `cons`
- 3.2 List Predicates
- 3.3 More Selectors
- 3.4 More Constructors: `list` and `append`
- 3.5 Other List Operations and Predicates
- 3.6 Using Lists as Stacks: `push` and `pop`
- 3.7 List Representation
- 3.8 Association Lists
- 3.9 Property Lists
- 3.10 Exercises
 - 3.10.1 Expression Drill, Part 1
 - 3.10.2 Expression Drill, Part 2
 - 3.10.3 New List Procedures
 - 3.10.4 Association List Personnel File
 - 3.10.5 Property List Personnel File
 - 3.10.6 More List People
 - 3.10.7 Daughter of Zeller
- 3.11 Chapter Summary

Chapter 4 Recursion

- 4.1 Recursive Programs
- 4.2 Recursive Money Changing
- 4.3 Recursive Roman Numerals
- 4.4 Recursive List Operations
- 4.5 `car/cdr` Revisited
- 4.6 Recursive Subfunctions
- 4.7 Exercises
 - 4.7.1 Checking Facts
 - 4.7.2 Legal Roman Numerals
 - 4.7.3 Making Changes
 - 4.7.4 Making More Changes
 - 4.7.5 Recursive `reverse`

- 4.7.6 Recursive `append`
- 4.7.7 Recursive `nth`
- 4.7.8 Recursive `lastcdr`
- 4.7.9 Recursive `remove-duplicates`
- 4.7.10 Recursive Check Balancing
- 4.7.11 Recursive NOW Account
- 4.7.12 Simple Pattern Matcher
- 4.7.13 Count Occurrences
- 4.7.14 Tree Addition
- 4.7.15 Tree Average
- 4.8 Chapter Summary

Chapter 5 Local vs. Global Reference

- 5.1 Modifying Values of Objects: `set`
- 5.2 Creating Local Variables: `let`
- 5.3 Indirect `set`
- 5.4 Exercises
 - 5.4.1 Expression Drill
 - 5.4.2 Identifying Local and Global Variables
 - 5.4.3 Local Variables and Making Change
 - 5.4.4 Niece of Zeller
- 5.5 Chapter Summary

Chapter 6 Characters and Strings

- 6.1 String and Character Predicates
- 6.2 Character Operations
- 6.3 String Operations
- 6.4 Example: String Searching
- 6.5 Example: Spelling Correction
- 6.6 Exercises
 - 6.6.1 String Drill
 - 6.6.2 String Procedures
 - 6.6.3 Sorting Lists
 - 6.6.4 Roman Numeral Characters
 - 6.6.5 String `reverse`

6.6.6 Spelling Correction

6.7 Chapter Summary

Chapter 7 Ports: Output and Input

7.1 The Terminal Is a Port

7.2 Output: Writing to Ports

7.3 `format`

7.4 Input: Reading from Ports

7.5 Files as Ports

7.6 Port Examples

7.7 Exercises

7.7.1 `column-print`

7.7.2 `split` Command

7.7.3 `tab` Command

7.7.4 `pinetree-print`

7.7.5 `peek-char` Problem

7.7.6 `split-fill`

7.7.7 Printing Recipes

7.7.8 Defining `format`

7.7.9 File Revision

7.7.10 File Comparison

7.7.11 File Sorting

7.8 Chapter Summary

Chapter 8 LAMBDA and LABELS

8.1 `lambda`

8.2 Procedural Arguments

8.3 `apply`

8.4 Special `cond` Syntax

8.5 Naming Local Procedures: `labels`

8.6 Mutually Recursive Procedures

8.7 Exercises

8.7.1 Expression Drill

8.7.2 More Cryptography

- 8.7.3 Deck of Cards
- 8.7.4 `reverse` with `labels`
- 8.7.5 Length Problems
- 8.8 Chapter Summary

Chapter 9 Control

- 9.1 `block` and `block0`
- 9.2 `case` and `select`
- 9.3 Iteration and `do`
- 9.4 Iteration versus Recursion
- 9.5 `iterate`
- 9.6 `catch`
- 9.7 Example: Binary Guessing Game
- 9.8 Exercises
 - 9.8.1 Bottles of Beer
 - 9.8.2 Iterative Average
 - 9.8.3 More Spelling Correction: Soundex
 - 9.8.4 Unwind protection
 - 9.8.5 Binary Game Catch
- 9.9 Chapter Summary

Chapter 10 Debugging

- 10.1 Preventing Errors
- 10.2 Detecting Errors
- 10.3 Elucidating Errors
- 10.4 Error Recovery
- 10.5 Exercises
 - 10.5.1 `my-error`
 - 10.5.2 Buggy `fact`
 - 10.5.3 `bad-length` Problem
 - 10.5.4 Pretty Printer
 - 10.5.5 Argument Checking
- 10.6 Chapter Summary

Chapter 11 Macros

- 11.1 Defining Macros
- 11.2 Backquote
- 11.3 Macros versus Procedures
- 11.4 Syntax Tables
- 11.5 Read Macros
- 11.6 Exercises
 - 11.6.1 Expression Drill
 - 11.6.2 `repeat` Macro with a Value
 - 11.6.3 `repeat` with `iterate`
 - 11.6.4 Changing the T Prompt
 - 11.6.5 `while` Macro
 - 11.6.6 `until` Macro
 - 11.6.7 `block0` Macro
 - 11.6.8 `dpsq` Macro
 - 11.6.9 ISA Inheritance Hierarchy
 - 11.6.10 Data-Driven `dpsq` Macro
 - 11.6.11 `msg` Macro
 - 11.6.12 Comment Read Macro
- 11.7 Chapter Summary

Chapter 12 Structures

- 12.1 Structures
- 12.2 Structures: More Details and Examples
- 12.3 Anonymous Structures
- 12.4 Exercises
 - 12.4.1 Sorting Teams
 - 12.4.2 Score Updates
 - 12.4.3 Person Structures
 - 12.4.4 Structured Guessing Game
 - 12.4.5 Database Management
 - 12.4.6 Defining `define-structure-type`
 - 12.4.7 `default` Macro
- 12.5 Chapter Summary

Chapter 13 Objects and Operations

- 13.1 Object-Oriented Programming Languages
- 13.2 Object-Oriented Programming in T
- 13.3 Object-Oriented Property Lists
- 13.4 Joining Objects
- 13.5 Structures as Objects in T
- 13.6 Exercises
 - 13.6.1 Symbol Generator Revisited
 - 13.6.2 Removing Property Values
 - 13.6.3 Object-Oriented Database
 - 13.6.4 Queue Object
 - 13.6.5 `make-better-plist`
 - 13.6.6 Object-Oriented Structures

Chapter 14 Vectors

- 14.1 Vectors in T
- 14.2 Two-Dimensional Arrays
- 14.3 Hash Tables
- 14.4 Testing Random Numbers
- 14.5 Using Random Numbers: Math Quiz
- 14.6 Infinite Objects and Lazy Evaluation
- 14.7 Exercises
 - 14.7.1 Expression Drill
 - 14.7.2 Tic-Tac-Toe
 - 14.7.3 More Tic-Tac-Toe
 - 14.7.4 Three-Dimensional Arrays
 - 14.7.5 n-Dimensional Arrays
 - 14.7.6 Hash Tables
 - 14.7.7 Searching Hash Tables
 - 14.7.8 Random Hash Tables
 - 14.7.9 More Hash Tables
 - 14.7.10 `new-hash`
 - 14.7.11 Hashed Databases
 - 14.7.12 Generalized Chi-Squared
 - 14.7.13 Shuffling Cards

- 14.7.14 Card Games
- 14.7.15 Chance Music
- 14.7.16 New Math
- 14.7.17 Lazy n-Dimensional Arrays
- 14.7.18 Executable Data Structures
- 14.8 Chapter Summary

Chapter 15 Environments and EVAL

- 15.1 Lexical Scoping
- 15.2 Environments
- 15.3 `eval`
- 15.4 `eval` Example: T Workspace
- 15.5 Locatives
- 15.6 `eval` Exposed
- 15.7 Exercises
 - 15.7.1 Export
 - 15.7.2 Cleaning the Slate
 - 15.7.3 Making Transcripts
 - 15.7.4 Workspace Editor
 - 15.7.5 `standard-simple-env`
 - 15.7.6 The Rest of `t-eval`
- 15.8 Chapter Summary

Chapter 16 Efficiency and Compilation

- 16.1 Coding Optimizations: Arithmetic
- 16.2 Coding Optimizations: Destructive Operations
- 16.3 GC
- 16.4 Compilation
- 16.5 More Compilation: Files and `herald`
- 16.6 Definition Declarations
- 16.7 Tail Recursion
- 16.8 Exercises
 - 16.8.1 Compilation Experiments
 - 16.8.2 Tail Recursive `reverse`

16.8.3	Tail Recursive <code>append</code>
16.8.4	Tail Recursive <code>last</code>
16.8.5	Tail Recursive <code>nth</code>
16.8.6	Tail Recursive <code>remove-duplicates</code>
16.9	Chapter Summary
Chapter 17 Implementation of T	
17.1	T for Two
17.2	BLISS/11 and RABBIT
17.3	S-1, TC, Tau, and Orbit
17.4	Summary
17.5	Exercises
17.5.1	Either <code>or</code>
17.5.2	Another <code>block</code>
17.5.3	Transformational Programming
17.6	Chapter Summary
Appendix A List of LISPs	
A.1	T
A.2	Scheme
A.3	Common LISP
Appendix B ASCII Character Codes	
Appendix C Answers to Selected Exercises	
Appendix D References	
Index
