

The Common Lisp Companion

Timothy D. Koschmann

Chapter 1 Introduction

- 1.1 Wherefore LISP?
- 1.2 LISP Family Tree
- 1.3 Conversing with LISP

Summary

New Common LISP Defined Names

For Further Reading

Chapter 2 The Rule of Three

- 2.1 The Three Rules of Evaluation
- 2.2 LISP Stands for List Processing
- 2.3 Common LISP Predicates
- 2.4 Control of Flow
- 2.5 Traditional LISP

Summary

New Common LISP Defined Names

For Further Reading

Chapter 3 Forms and Functions

- 3.1 Defining Common LISP Functions
- 3.2 Functions That Call Themselves
- 3.3 Recursion versus Iteration
- 3.4 Passing Functions as Arguments
- 3.5 A Sense of Style

Summary

New Common LISP Defined Names

Chapter 4 Inquisitor of Structures

4.1 Common LISP Symbols

4.2 LISP Lists

4.3 Sequences

4.4 Data Tables

Summary

New Common LISP Defined Names

For Further Reading

Chapter 5 Objects All Sublime

5.1 Common LISP Structures

5.2 Objects: Classes and Instances

5.3 Representing the Problem

Summary

New Common LISP Defined Names

For Further Reading

Chapter 6 Methods

6.1 Generic Functions

6.2 Method Combination

6.3 CLOS Programming Practice

Summary

New Common LISP Defined Names

For Further Reading

Chapter 7 Gently Down the Stream

7.1 Lisp I/O

7.2 Formatted Output

7.3 File Streams

Summary

New Common LISP Defined Names
