

Object-Oriented Programming: The CLOS Perspective

Andreas Paepcke (ed.)

Preface

Acknowledgments

Part I Introduction

Chapter 1 An Introduction to CLOS

Linda G. DeMichiel

Chapter 2 CLOS in Context: The Shape of the Design Space

Daniel G. Bobrow, Richard P. Gabriel, and Jon L White

Part II The Metaobject Protocol

Chapter 3 User-Level Language Crafting: Introducing the CLOS Metaobject Protocol

Andreas Paepcke

Chapter 4 Metaobject Protocols: Why We Want Them and What Else They Can Do

Gregor Kiczales, J. Michael Ashley, Luis H. Rodriguez Jr., Amin Vahdat, and Daniel G. Bobrow

Chapter 5 Metaobject Programming in CLOS

Giuseppe Attardi

Chapter 6 The Silica Window System: The Metalevel Approach Applied More Broadly

Ramana Rao

Part III Comparisons with Other Languages

Chapter 7 CLOS and C++

Linda G. DeMichiel

Chapter 8 CLOS, Eiffel, and Sather

Heinz W. Schmidt and Stephen M. Omohundro

Chapter 9 CLOS and Smalltalk

Pierre Cointe

Part IV CLOS Uses and Methodology

Chapter 10 Documenting Protocols in CLOS: Keeping the Promise of Reuse

John Collins

Chapter 11 CLOS & LispView: Users' Experiences Distilled

Rick Dinitz, Philip McBride, Hans Muller, and John R. Rose

Chapter 12 Using CLOS to Implement a Hybrid Knowledge Representation Tool

Jiri Dvorak and Horst Bunke

Part V Implementation

Chapter 13 TICLOS: An Implementation of CLOS for the Explorer Family

Patrick H. Dussud

Chapter 14 Efficient Method Dispatch in PCL

Gregor Kiczales and Luis H. Rodriguez Jr.
